

Press Invitation

HKU Faculty of Science introducing new initiatives in curricula enhancement Equipping outstanding undergraduate students for versatile developments

October 25, 2018

The Faculty of Science of The University of Hong Kong (HKU) is pleased to announce several key developments of its science curricula – introducing 4 accredited intensive majors, 3 articulation pathways, 2 interdisciplinary Bachelor of Arts and Sciences Programmes, and the launch of a new Minor in Science Entrepreneurship, equipping outstanding undergraduate students with skills for versatile developments according to their aspirations, ability and interests.

Media members are cordially invited to a briefing session on the new initiatives of HKU Science curricula on October 30, 2018 (Tuesday), including the new interdisciplinary programme — 6224 Bachelor of Arts and Sciences (Applied Artificial Intelligence), and our seamless articulation to the Doctor of Veterinary Medicine (DVM) programme at the University of Melbourne.

Details are as follows:

Date: October 30, 2018 (Tuesday)

Time: 11 am to 12 noon

Venue: Faculty of Science Office, G/F, Chong Yuet Ming Physics Building, Main Campus, HKU

Spokespersons:

Professor Alice Wong, Associate Dean (Teaching & Learning), HKU Faculty of Science

Professor Jeff Yao, Co-director of Bachelor of Arts and Sciences (Applied Artificial Intelligence) Programme
