

Lunar Samples Arrive in Hong Kong: HKU Geologists Set to Unveil the Mysteries of the Moon's Volcanic History

月球樣本抵港：

香港大學地質學家成功領取樣本
或將揭開月球火山歷史之謎

- ❖ **This marks the first time that lunar samples have arrived in Hong Kong for research purposes**
- ❖ **月球樣本首次作為科研樣本來到香港**
- ❖ **The HKU team will analyse the samples for understanding the lunar geological and thermal history**
- ❖ **港大團隊將分析月球樣本以了解月球的地質和熱歷史**
- ❖ **Accelerate lunar and planetary science development and enhance deep space innovation in Hong Kong**
- ❖ **促進香港在月球和行星科學領域的發展，提高香港在深空探測方面的創新能力**
- ❖ **Deepen ties between Hong Kong and the nation in deep space exploration**
- ❖ **加強香港與內地在深空探測領域的合作**

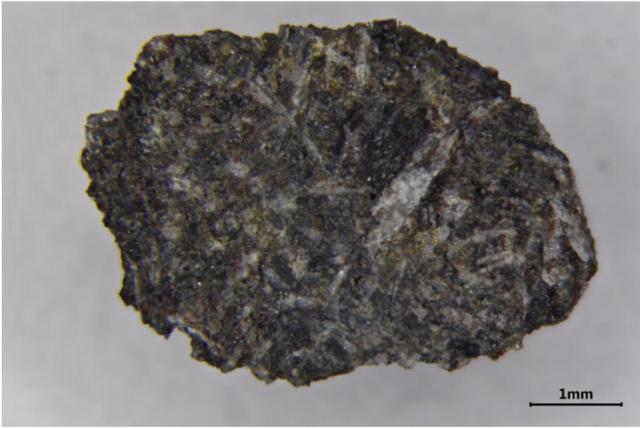

Sample No. 樣本編號: CE5C0200
 Mass 質量: 400 mg

Sample No. 樣本編號: CE5C1000
 Mass 質量: 400 mg

Sample No. 樣本編號: CE5C0800YJYX005GP
 Mass 質量: 16.6 mg

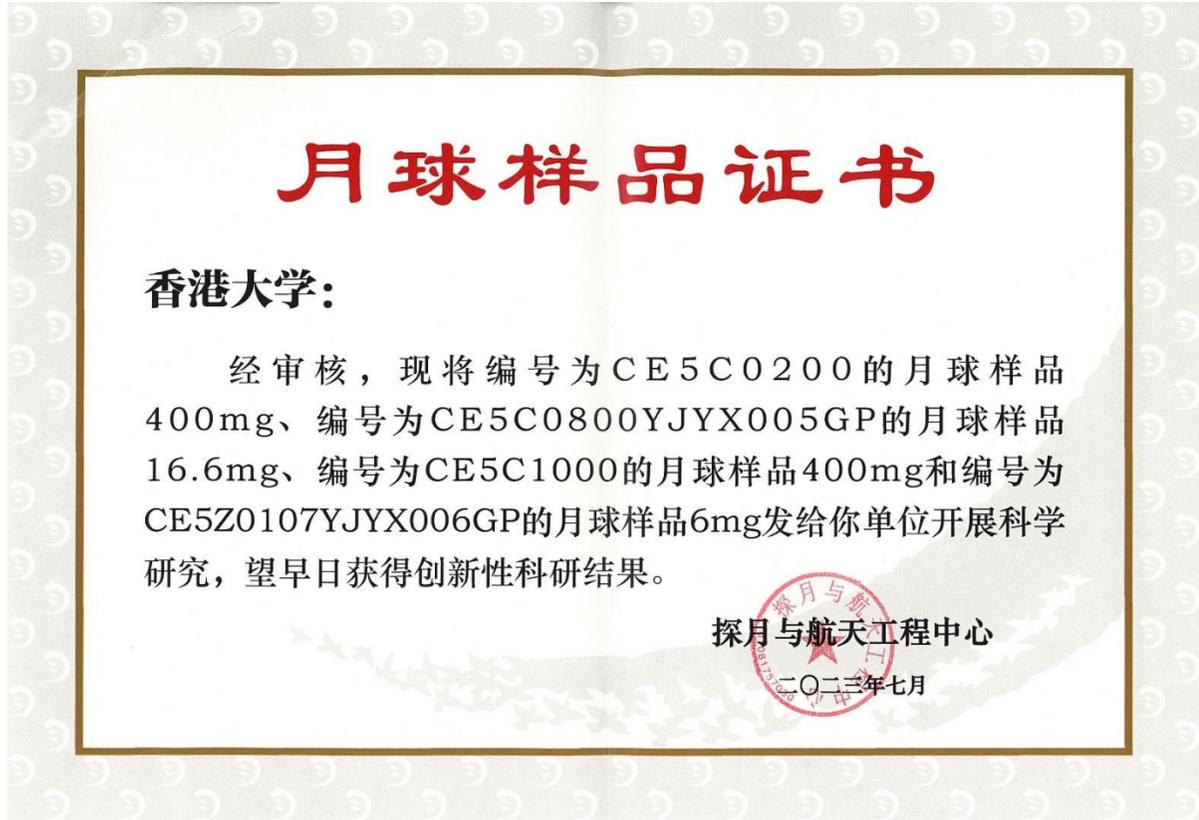

Sample No. 樣本編號: CE5Z0107YJYX006GP
 Mass 質量: 6 mg

**Weigh 822.6 mg
 in total**

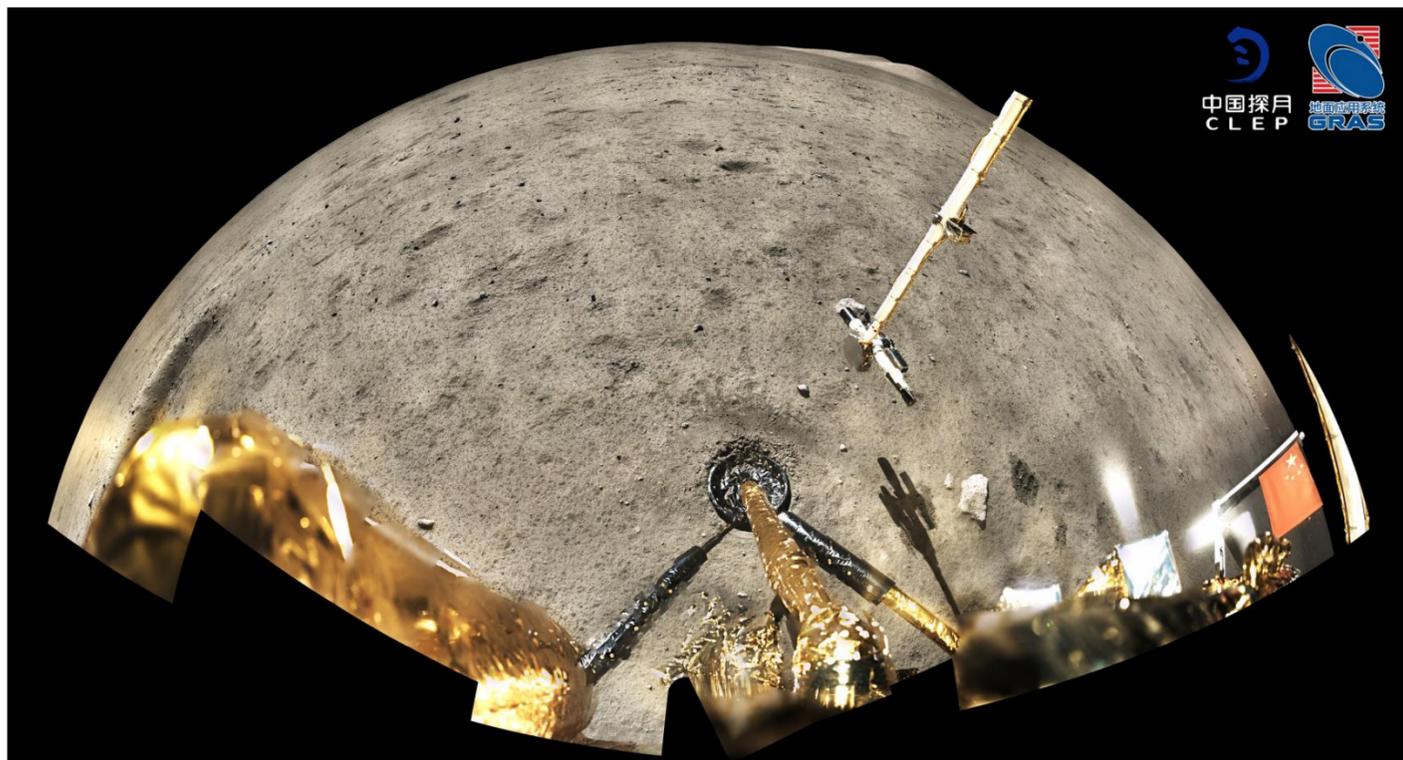

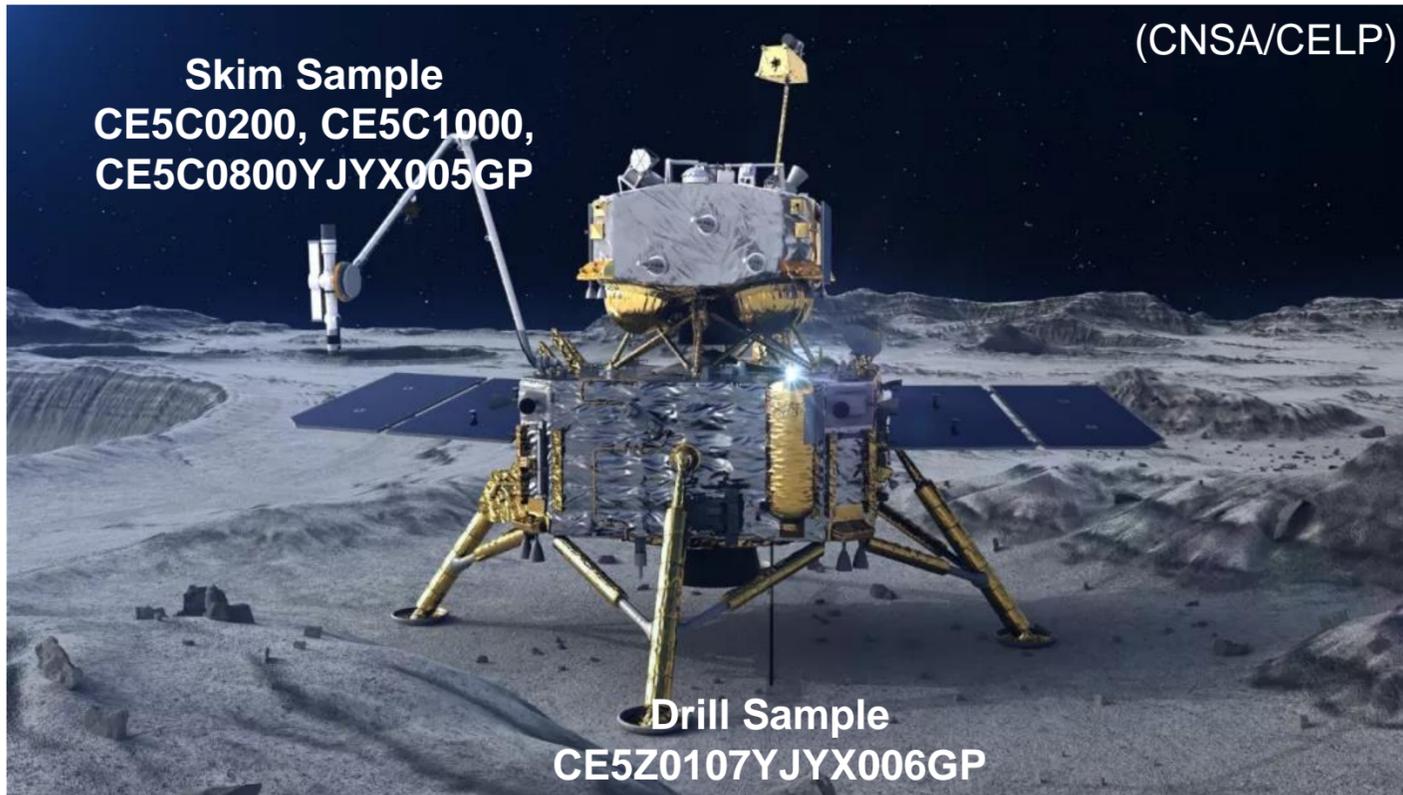

**Lunar Sample Collection at
 National Astronomical
 Observatories**
 在中國科學院國家天文台
 領取月球樣本

**Lunar Sample Certificate
 from Lunar Exploration
 and Space Engineering
 Center**
 探月與航天工程中心頒發的
 月球樣品證書

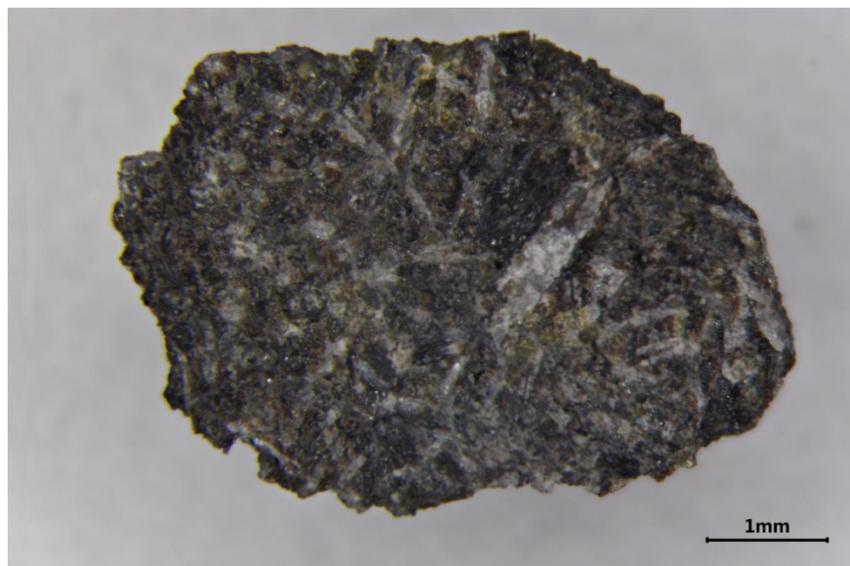

Chang'e-5 Lunar Sample Return Mission 嫦娥五號月球採樣返回任務

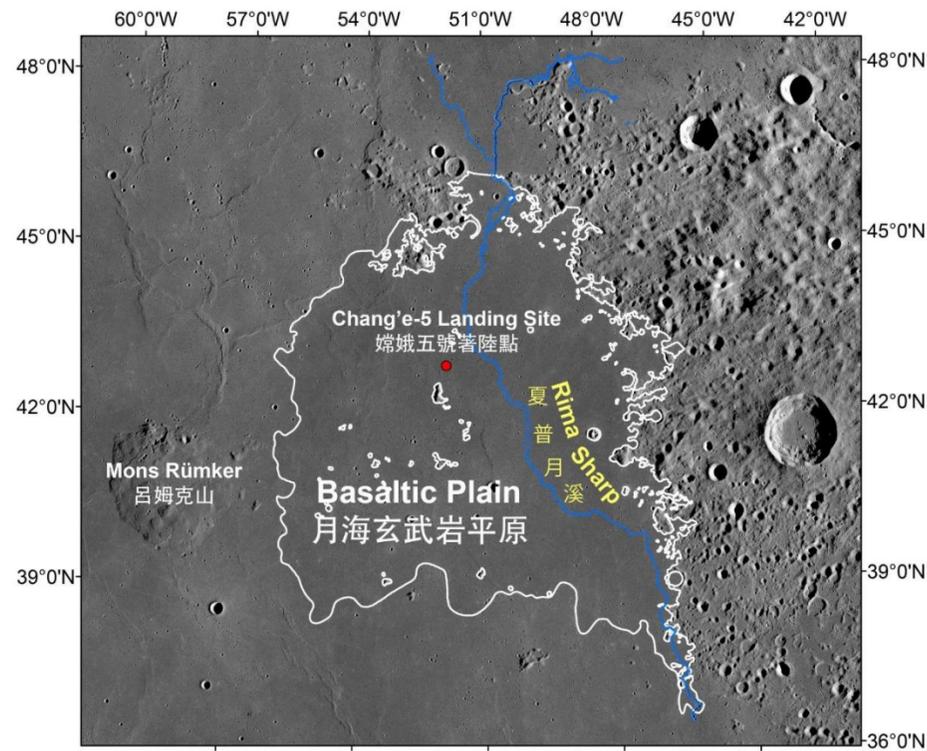

- ❖ Chang'e-5 is China's first lunar sample return mission, launched on Nov. 24, 2020, and landed in the Procellarum KREEP Terrane on Dec. 1.
- ❖ 嫦娥五號是中國首次執行月球採樣返回任務，於2020年11月24日發射，12月1日著陸於風暴洋克里普地體內部。
- ❖ Previous studies by Dr Qian predicted the Chang'e-5 landing site contains one of the youngest lunar basalts with significant scientific meanings and proposed Chang'e-5 to land there.
- ❖ 錢博士早前的研究提出嫦娥五號著陸點擁有月球上最年輕的玄武岩之一，具有非常重要的科學價值，他因而建議在該地區進行著陸。
- ❖ Laboratory studies proved Chang'e-5 basalt is almost 1 billion years younger than any previous returned lunar basalts, raising the question of how those young basalts originated.
- ❖ 經實驗室研究證實，嫦娥五號採集的玄武岩比任何以往採集的月球玄武岩年輕近10億年。由於這個發現，科學家們開始探究這些年輕玄武岩的起源問題。
