

HKU 6901 BSc BACHELOR OF SCIENCE

2022-
2023

Direct Admissions Scheme to the 3rd Year for Associate Degree & Higher Diploma Graduates

1 Top-notch world university in Asia

1st among all universities in Hong Kong (QS World University Rankings 2022 & Times Higher Education World University Ranking 2022)

16.5% of professoriate staff are the world's top 1% scholars according to Clarivate Analytics' Essential Science Indicators in the Faculty 2020

2 International environment

3 Direct entry to the 3rd year of the programme

4 14 Science Majors to suit your interests and career aspirations

5 Granting of 120 credits of advanced standing *(equivalent to the credits of 2 years of study)*

6 Diverse learning experiences

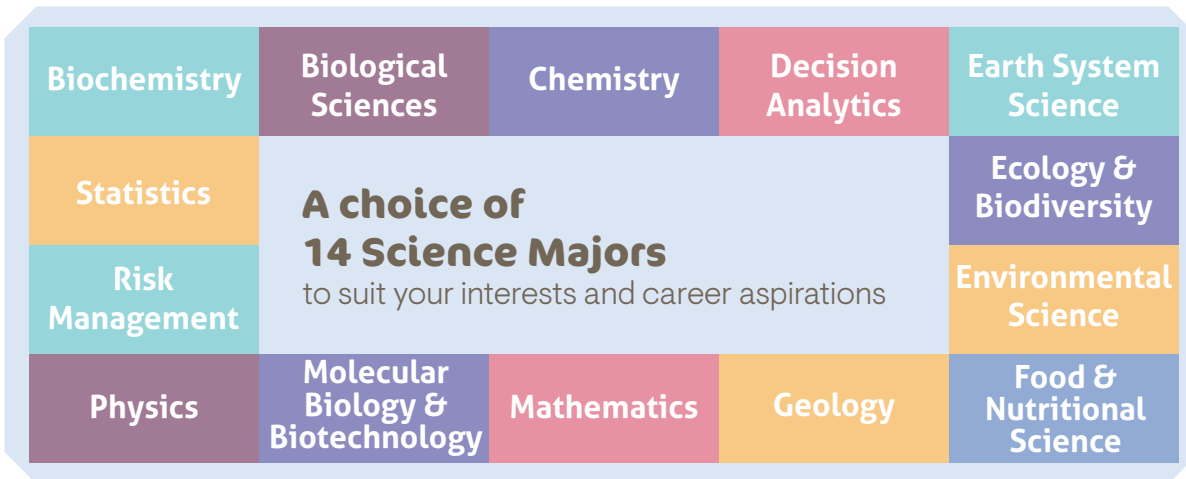

8 Essentially 100% employment rate

7 Availability of Minor option

The Direct Admissions Scheme is open to students from all recognised institutes. Graduates of the following institutes have been admitted in the past:

- ◆ College of International Education, Hong Kong Baptist University
- ◆ Community College of City University
- ◆ HKU SPACE Community College
- ◆ HKU SPACE Po Leung Kuk Community College
- ◆ Hong Kong Institute of Vocational Education
- ◆ School of Continuing and Professional Studies, The Chinese University of Hong Kong
- ◆ The Hong Kong Polytechnic University Community College (Hong Kong Community College)

What our students say

Ashley LI

*BSc student (Major in Biological Sciences)
Associate Degree of Science in Biology (2020) from
Hong Kong Community College of The Hong Kong Polytechnic University*

I have the hectic pace of university life in HKU but here is also where I met many fabulous people. Being a science student of HKU Science, I have been given many practicals to conduct laboratory experiments and get familiar with different technologies in biological sciences. Also, thanks to our professor for making the best effort to organise a field trip for us under the pandemic situation, I took an outdoor field course at the study site of Three Fathoms Cove. The course provided me a valuable opportunity to gain hands-on experience on field sampling, and to investigate the influence of abiotic factors on species.

Josephine Suet Ying TAM

*BSc student (Major in Food and Nutritional Science)
Higher Diploma in Nutrition and Food Management (2020) from
HKU SPACE Po Leung Kuk Stanley Ho Community College*

I feel honoured to be a member of HKU Science, where everyone is very supportive. Here I not only can acquire solid knowledge, but also have the opportunities to try out new things and gain valuable experiences. I worked as an intern in my Year 3 summer in a nutrition consulting company, where I could apply my knowledge and enhance my understanding of nutrition-related health issues. I realised the responsibility of being a nutritionist and had a clearer picture about the health industry; for instance, I learnt that the common poor liver function among clients are indeed diet-induced, which should not be overlooked. Thus I was inspired to take a further step and apply my knowledge, to promote healthy diet among the society.

Alex Lai Ying CHAN

*2020 BSc graduate (Major in Ecology & Biodiversity, Minor in Environmental Science)
Associate Degree of Science in Environmental Studies (2017) from
City University of Hong Kong*

HKU is where people try tirelessly to achieve expertise. There are many opportunities for undergraduates to explore and to learn. For me, engaging in the Summer Research Fellowship (SRF) was a fruitful experience to work hand-in-hand with academics and professionals to produce quality research. I was trained for field sampling, laboratory works and data analysis. It was inspirational and fulfilling to complete a self-initiated project and contribute to the field I am most interested in – Molecular Ecology, with the invaluable support and assistance from my supervisor. From that, I am now determined to continue my journey in scientific research.
