Two themes are accredited by the Geological Society of London

- **Engineering Geology Theme**
- **Engineering Geology with HKIE Approved Courses Theme**

Offers courses which graduates in Earth Sciences or Geology would need to meet the entry requirements of the HKIE in the Geotechnical Discipline

Students are required to pay Caution Money (HK$350, refundable on graduation subject to no claims being made) and Graduation Fee (HK$350)

| Tuition fees | Composition fee: HK$140,000* (subject to approval) |
| Study load | Credits: 66 / 69 credits Learning hours: 1,440 or 1,500 hours (including 360 hours for the project and contact hours of 400 / 415 hours) |
| Programme duration | Full-time: 1 year Part-time: 2 years |
| Class schedule | Teaching: mainly on weekday evenings • Field and laboratory work: weekends • Students are expected to study year-round and teaching is also conducted during Reading Weeks and Summer Semester |
| Medium of instruction | English |

Professional recognition
- The two themes offered in 2021 are accredited by the Geological Society of London which awards the qualification of Chartered Geologist
- Applicants with an accredited MSc can apply for Chartered Geologist with fewer years of working experience
- 14 courses of the MSc are approved by the HKIE, which are the required additional courses for Earth Sciences or Geology graduates for admission into the HKIE in the Geotechnical Discipline

Network and transferable skills
- The chance to learn from top professors and leading practitioners from industry
- Technical knowledge and professional skills you can apply anywhere
- An internship in industry for selected full-time students
- A valuable network of industry connections, career advice and inspiration

Career development
Employers of recent MSc graduates include: Airport Authority, Arup, Arcadis, Atkins, Dragages, Fugro, Gammon, Geotechnical Engineering Office, Jacobs, MTRC, Meinhardt and Vibro

Scholarships and financial support
- Association of Geotechnical and Geoenvironmental Specialists (Hong Kong) Scholarship
  - This $10,000 scholarship is awarded annually on a merit basis
- Government’s Extended Non-means Tested Loan Scheme (for local students only)
  - [https://www.edutone.gov.hk/eng/loans/程序指引/開支指引/overview.htm](https://www.edutone.gov.hk/eng/loans/programme/overview.htm)
- Taufik Ali Memorial Scholarships for Postgraduate Studies
  - Persons of the Muslim faith born in Hong Kong or Penang are eligible to apply
  - The scholarship may cover tuition fees and living allowance on a case-by-case basis
  - Contact Professor Malone for details
- For more detail: [https://www.scholarships.hku.hk/scholarships/detail/255](https://www.scholarships.hku.hk/scholarships/detail/255)

Prizes
Halcyon Prizes are awarded to the Best Student and the Best Dissertation

Courses reimbursable by the Continuing Education Fund (CEF)
- GEOS7012 Site investigation and engineering geological techniques
- GEOS8101 Engineering geology and geotechnical design
- GEOS8102 Rock engineering and geomechanics

Why this Programme

- Offers courses which graduates in Earth Sciences or Geology would need to meet the entry requirements of the HKIE in the Geotechnical Discipline
- Offers all 14 of the additional courses which graduates in Earth Sciences or Geology would need to meet the entry requirements of the HKIE in the Geotechnical Discipline

World-class Rankings of HKU

  - Eminent Subject Rankings
    - Environmental Sciences
    - Earth & Marine Sciences
  - Times Higher Education (THE) World Rankings 2020
    - #22 Asia Rankings 2020
    - #4 Asia Rankings 2020
  - Clarivate Analytics’ Essential Science Indicators 2019
    - Top-notch Scientists in the Faculty
      - 15.4% of our professoriate staff are the world’s Top 1% scholars

Career prospects

- Engineering geologists who strive to improve their performance in professional work
- Earth Sciences or Geology graduates who wish to fulfill the entry requirements of HKIE in the Geotechnical Discipline

Host

- Department of Earth Sciences
- Since 1995 the Department has focused primarily on the geology of Asia and the Asia Pacific Regions, carrying out cutting-edge frontier research and dealing with fundamental scientific challenges of societal relevance.
- Our work on applied geosciences is of importance, considering the highly urbanised setting of Hong Kong and the region. We have made significant contributions in hydrogeology, rock mechanics, engineering geology, geophysics and applied geochemistry.

Hear from our graduate

- At HKU I got the chance to learn from world-class professors who have abundant working experience and are willing to share their knowledge. My MSc included an internship in Arup and on graduating I got a job in Hong Kong with Fugro.
To be eligible for the award of the MSc in the field of Applied Geosciences, a student shall complete all core courses and total credits prescribed in a selected theme.

**Engineering Geology Theme (66 credits)**

**Core courses**
- GEOS7010 Geology principles and practice (6 credits), for non-geologists
- GEOS7011 Advanced geology of Hong Kong (6 credits), for geologists
- GEOS7033 Geology of Hong Kong (6 credits), for non-geologists
- GEOS7012 Site investigation and engineering geological techniques (6 credits)
- GEOS7015 Rock mechanics (3 credits)
- GEOS7016 Soil mechanics (3 credits)
- GEOS7020 Project Part I (6 credits)
- GEOS7021 Geotechnical engineering (3 credits)
- GEOS8021 Geological fieldwork II (3 credits), for geologists
- GEOS8001 Hydrogeology (3 credits)
- GEOS8002 Professional practice in applied geosciences (3 credits)
- GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures (3 credits)
- GEOS8020 Project Part II (12 credits)
- GEOS8101 Engineering geology and geotechnical design (6 credits)
- GEOS8102 Rock engineering and geomaterials (6 credits)
- GEOS8104 Natural hillside landslide and hazard studies (3 credits)
- GEOS8204 Basic structural mechanics and behaviour (3 credits)

**Elective course**
- GEOS8022 Course of directed studies (3 credits)

*Core courses for students with a first degree in Geology or a related subject: GEOS7010, 7012, 7015, 7016, 7020, 8002, 8003, 8004, 8101, 8102, 8104, 8204 – 66 credits. GEOS8022 may be substituted for GEOS8024. Core courses for students whose first degree is not in Geology or a related subject: GEOS7012, 7015, 7016, 7020, 7021, 7033, 8001, 8002, 8003, 8004, 8101, 8102, 8104, 8204 – 69 credits.*

**Remarks:**
1. Certain courses may be accepted as electives at the discretion of the Programme Director.
2. The programme structure will be reviewed from time to time and is subject to change.
3. To be eligible for the award of the MSc in the field of Applied Geosciences, a student shall complete all core courses and total credits prescribed in a selected theme.

**Engineering Geology with HKIE Approved Course Theme (69 credits)**

**Core courses**
- GEOS7012 Site investigation and engineering geological techniques (6 credits)
- GEOS7015 Rock mechanics (3 credits)
- GEOS7016 Soil mechanics (3 credits)
- GEOS7020 Project Part I (6 credits)
- GEOS7024 Management (3 credits)
- GEOS8001 Hydrogeology (3 credits)
- GEOS8002 Professional practice in applied geosciences (3 credits)
- GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures (3 credits)
- GEOS8020 Project Part II (12 credits)
- GEOS8101 Engineering geology and geotechnical design (6 credits)
- GEOS8102 Rock engineering and geomaterials (6 credits)
- GEOS8204 Basic structural mechanics and behaviour (3 credits)
- GEOS8205 Mathematics I (6 credits)
- GEOS8206 Mathematics II (6 credits)

**Elective course**
- GEOS8022 Course of directed studies (3 credits)

*Core courses for students with a first degree in Geology or a related subject: GEOS7010, 7012, 7015, 7016, 7020, 8002, 8003, 8004, 8101, 8102, 8104, 8204 – 69 credits. GEOS8022 may be substituted for GEOS8024. Core courses for students whose first degree is not in Geology or a related subject: GEOS7012, 7015, 7016, 7020, 7021, 7033, 8001, 8002, 8003, 8004, 8101, 8102, 8104, 8204 – 69 credits.*

**Remarks:**
1. The programme structure will be reviewed from time to time and is subject to change.
2. To be eligible for the award of the MSc in the field of Applied Geosciences, a student shall complete all core courses and total credits prescribed in a selected theme.
**Programme Highlights**

**Description of Selected Course (Provisional)**

**GEOS7011 Advanced geology of Hong Kong**
This advanced course examines specialist aspects of the rocks and geological formations and structures of Hong Kong and their significance in the context of geotechnical engineering, environmental management and resource development. Topics include volcanic and granitic rocks, sedimentary and metamorphic rocks, weathering processes, superficial deposits, geology and geological aspects of landslides.

**GEOS7012 Site investigation and engineering geological techniques**
A professional course on the concepts and skills used in geotechnical site investigation. Topics include the design of site investigations, desk study and walkover survey, aerial photographic interpretation, soil and rock classification, ground investigation technology and laboratory testing.

**GEOS7015 Rock mechanics**
The course introduces the basic concepts of rock mechanics used in geotechnical practice. Topics include index properties, strength and deformability of intact rock; distribution and measurement of in-situ stresses; and shear strength of discontinuities in rock masses.

**GEOS7016 Soil mechanics**
An examination of the underlying soil mechanics theory used in geotechnical practice. The course reviews phase relationships, soil classification, compaction, fluid flow and effective stress concepts; and provides a more detailed analysis of elasticity, shear strength and consolidation.

**GEOS7024 Management**
This course provides students with basic knowledge of project management practice. It will cover most of the following topics: engineering processes, programming and procurement strategies; contract management; construction site safety, health and environmental aspects; quality control and quality assurance.

**GEOS8001 Hydrogeology**
To study the role of sub-surface water in engineering and environmental applications. Topics include hydrologic cycle, properties of aquifers controlling transmissivity, storage and quality of groundwater, quantification of groundwater flow, field investigation, assessment of field parameters and applications of hydrogeology.

**GEOS8002 Professional practice in applied geosciences**
An examination of issues in professional practice in applied geosciences; including regulation of practice, professional ethics and law, contracts and risk management.

**GEOS8021 Geological fieldwork II**
Self-directed study in the field over a 6-month period leading to the production of maps, field sheets, narrative accounts and other geological records for assessment. The fieldwork may be undertaken in association with the excursions of the Department of Earth Sciences, the local learned societies or independently.

**GEOS80101 Engineering geology and geotechnical design**
An examination of civil engineering design methodology and the application of soil mechanics theory and empiricism in geotechnical design. Emphasis is given to soil slopes and embankments, earth pressure and retaining structures; and shallow and deep foundations.

**GEOS80102 Rock engineering and geomechanics**
This course gives a brief introduction to the design methodology and systems approach in rock engineering, focusing on the analysis of engineering geological data in designing rock structures. Uses of rock mechanics input, empirical classifications in analysis, design of rock slopes, tunnel excavation and support systems are illustrated with cases.

**GEOS80204 Basic structural mechanics and behaviour**
The course covers most of the following topics: Behaviour of structural members subjected to tension, compression, bending, shear and torsion. Buckling of compression members. Statically determinate and indeterminate structures; including the concept of redundancy of structural members. Load transfer mechanisms of structural systems including foundations and sharing systems. General behaviour and basic concepts in design of reinforced concrete members. Structural design of foundations and retaining walls.

See the prospectus for full information of the courses: https://www.earthsciences.hku.hk/f/upload/1023/Applied%20Geoscience_Prospectus.pdf
Admissions

Requirements

Applicants should possess a Bachelor’s degree with First or Second Class Honours (or GPA equivalent) in Science, Engineering or a related subject.

How to apply

Application opens in **November 2020**
Non-local applications deadline: **12 noon, April 30, 2021 (GMT +8)**
Local applications deadline is extended to: **12 noon, June 30, 2021 (GMT +8)**
Full-time students wishing to take internship should apply early

Online application

*aai.hku.hk/tpg*
