The Programme offers:

- Food professionals an advanced training in management skills and marketing research methodology so as to enhance the competitiveness of local food manufacturers in a changing market.

- Secondary school teachers the relevant training to prepare themselves to teach under the New Senior Secondary Curriculum, e.g. Technology & Living.

- Practical approaches to quality assurance and safety management in processing, packaging, storage and distribution of food products, waste management and control, as well as market research, financial planning, product development and evaluation, and compliance with food laws and regulations.

Admission Requirements

A Bachelor's degree with Honours in science. Preference will be given to those recommended by their present employers.
