Notes:

- As there may be different subclasses in each course, the above time slots are suggestions only. Students can choose other subclasses of the above-mentioned courses should they prefer, as long as there are no time clashes. Please note that seats are not reserved for actuarial freshmen in CAES1000 and subclasses other than the ones listed above.
- The above timetables are put together for students' reference only. In the event of discrepancies between the above timeslots and the online information in Portal, the online information in Portal shall prevail.
- Students should always select core or required courses first, i.e. the above-mentioned courses when adding courses into their course selection reports.
- Students should check their class selection results periodically. If students are not successful in getting a place in their first choice, they should choose another time slot, given that each subclass has a quota.
- Students are strongly advised to complete their course selection exercise before the suspension period. This is because the number of available places in certain courses may drop significantly after the suspension period, where course-based clearing (or so-called class balloting) will be performed.
- Students are also reminded to pay attention to the quota and drop-consent, if applicable, of each course. Any enquiries about the courses should be directed to the corresponding *course-offering* departments/schools if necessary.
